

Table of Contents

Foreword by <i>James E. Birren</i>	v
Table of Contents	vii
Acknowledgments	ix
1 General Introduction	1
1.1 Introduction	1
1.1.1 Autobiographical memory	1
1.1.2 Life-line Interview Method	2
1.1.3 Purpose	3
1.1.4 Overview	3
1.2 Autobiographical memory	3
1.2.1 History	3
1.2.2 Definition	4
1.2.3 Organization of autobiographical knowledge	5
1.2.4 Methods	5
1.2.5 Life-line Interview Method	6
1.3 Life events	8
1.3.1 Overview	8
1.3.2 Life story	9
1.3.3 Categorization	11
1.4 Method	13
1.4.1 Design	13
1.4.2 Respondents	14
1.4.3 Life-line Interview Method	15
1.4.4 Analysis	17
2 Number of Events	19
2.1 Introduction	19
2.2 Method	22
2.3 Results	23
2.3.1 Number of events	23
2.3.2 Distribution of events	26
2.3.3 Age of first and last event, and subjective life expectancy	30
2.4 Discussion	31
2.4.1 Sum of past and future events is constant	31
2.4.2 The ratio of past and total number of events is dependent of age	31
2.4.3 Over waves respondents report more events	31
2.4.4 The distribution of events over the lifespan shows a bump, and recency and proximity effects	32
2.4.5 Mean age of first event is 12 years; mean age of last event is dependent of age	32
3 Affect of Events	34
3.1 Introduction	34
3.2 Method	36
3.3 Results	37
3.3.1 Mean affect	37
3.3.2 Percentage of intense affect	39
3.3.3 Distribution of affect over the lifespan	41

3.3.4	Affect first and last event	48
3.3.5	Best and worst times of life.	49
3.4	Discussion	52
3.4.1	Overall, life is perceived as affective neutral	52
3.4.2	As people grow older the past is valued more positively and the future more negatively.	52
3.4.3	The past evokes more intense feelings than the future	53
3.4.4	Extreme negative is stronger than extreme positive	53
3.4.5	Over a period of five years there is no significant change in the mean affective rating of life.	53
3.4.6	Negative memories follow the forgetting curve; for positive memories there is a bump and a proximity effect.	53
3.4.7	Traumatic events have the power to disturb the 'normal' pattern of distribution of events	55
3.4.8	The first event recalled is accompanied by a negative affect.	55
3.4.9	The best period in life is the period of 20 to 40 years of age.	55
3.4.10	The worst periods in life are old age and childhood.	56
4	Content of Events	58
4.1	Introduction	58
4.2	Method.	59
4.3	Results	60
4.3.1	W1: Content of events.	60
4.3.2	W1: Affect of events	63
4.3.3	W1: Patterns of events.	64
4.4	Discussion	71
5	Dynamics	75
5.1	Introduction	75
5.2	Method	78
5.3	Results	78
5.3.1	W1 W2 W3: Content of events	78
5.3.2	W1 W2 W3: Affect of events	79
5.3.3	W1 W2 W3: Patterns of events	80
5.3.4	W1 → W2 → W3: Number of stable events	87
5.3.5	W1 → W2 → W3: Affect of stable events	93
5.3.6	W1 → W2 → W3: Content of stable events.	97
5.3.7	W1 → W2 → W3: Bump and Present	102
5.4	Discussion	106
6	General Discussion	115
6.1	Methodological issues	115
6.2	Autobiographical memory effects	117
6.3	Autobiographical memory over the lifespan	120
6.4	Future studies.	122
7	Summary and Conclusion	124
7.1	Summary	124
7.2	Conclusion	126
	References	129
	Supplement	139
	LIM Life-line Interview Method Manual by <i>Johannes J.F. Schroots</i>	141
	Enclosed CD	
	Appendix: Figures and Tables
